

A COVER FOR A NOTEBOOK COMPUTER

Abstract

This cover comprises a top cover (FIG.1A) for adhering to a top side of a notebook computer, and a bottom cover (FIG.1C) for adhering to the bottom side of the notebook, the top and bottom covers sandwich the notebook computer (FIG.2A, FIG.2B). The top cover has blades (1, 2, 3) for wrapping the notebook (FIG.3), and the blades function as a hood for reducing sunlight shining on the LCD panel of the notebook computer (FIG.6). This cover can function as a half open case (FIG.4), or a bag for a notebook or laptop computer or other portable devices by linking up a belt or rope (12) to this cover (FIG.8). The bottom cover has a blade (4) with a hole for securing to the Anti-Theft Lock Slot of the notebook by a hook bolt (FIG.4, FIG.7). This mechanism is designed for a more secured connection between the bottom cover and the notebook computer.
